THE SCIENCE OF CONNECTIONS

Laboratory Quality Policy

OCIPL is dedicated to upholding professional testing standards in order to align with the technical and Management System requisites outlined in ISO/IEC 17025-2017, ensuring complete customer satisfaction.

This commitment is realized through the following initiatives:

- Complying with the requirements of ISO/IEC 17025-2017
- Continuously enhancing the quality of services and the efficiency of the management system.
- Utilization of Calibrated Equipment for all testing activities to ensure accuracy and reliability.
- Provision of Comprehensive Training sessions to laboratory personnel, covering testing procedures and other relevant areas, on a periodic basis.
- *By monitoring the competence of lab personnel, risks to impartiality, if any, and by maintaining consistency in the lab operations.*

Through these measures, OCIPL strives to not only meet but exceed the expectations of its customers while maintaining compliance with internationally recognized standards for testing services.
